Fluid Phase Equilibria, 73 (1992) 341–342
Elsevier Science Publishers B.V., Amsterdam

Contents Volume 73 (1992)

Volume 73, Nos. 1–2

Correlation of solubilities of carbon dioxide in aromatic compounds
J.-S. Yau and F.-N. Tsai (Tainin, Taiwan) 1–25

The Bender equation of state for describing thermodynamic properties of krypton, neon, fluorine, sulfur dioxide and water over a wide range of state
A. Polt and G. Maurer (Kaiserslautern, Germany) 27–38

Effect of hard-sphere structure on pure-component equation of state calculations
P. Vimalchand, A. Thomas, I.G. Economou and M.D. Donohue (Baltimore, MD, USA) 39–55

Calculation and prediction of thermodynamic properties of non-electrolyte mixtures with the modified TASQUAC model
D. Brennecke, B. Schäfer and R. Lacmann (Braunschweig, Germany) 57–79

High pressure vapor–liquid equilibria of aromatic hydrocarbons with carbon dioxide and ethane
J.T. Reilly, C.-H. Kim, A.B. Clark and M.D. Donohue (Baltimore, MD, USA) 81–107

Unusual retrograde condensation in ternary hydrocarbon systems
J. Gregorowicz, Th.W. de Loos and J. de Swaan Arons (Delft, The Netherlands) 109–115

Phase equilibrium measurements for the binary mixtures of 1-octanol plus CO_2, C_2H_6 and C_2H_4
W.L. Weng and M.J. Lee (Taipei, Taiwan) 117–127

Liquid–liquid equilibrium of water + 2-propanol + 2,2,4-trimethylpentane ternary at 293.2 ± 0.1 K
N. Arda and A.A. Sayar (Istanbul, Turkey) 129–138

Infinite-dilution activity coefficients for systems with α- and β-pinene
P. Proust, E. Meyer and Z. Jaque (Valparaíso, Chile) 139–146

Experimental vapor–liquid equilibria in the systems R 22–R 23, R 22–CO_2, CS_2–R 22, R 23–CO_2, CS_2–R 23 and their correlation by equations of state
H. Roth, P. Peters-Gerth and K. Lucas (Duisberg, Germany) 147–166

Solubility of hydrogen sulfide in mixtures of *N*-methylpyrrolidone with alkanolamines
F. Murrieta-Guevara, E. Rebolledo-Libreros and A. Trejo (México D.F., México) 167–174

Measurement of liquid–solid phase equilibrium in ternary systems of water–sucrose–glucose and water–sucrose–fructose and prediction with UNIFAC
Y. Abed (Agdal Robat, Morocco) N. Gabas, M.L. Delia (Toulouse, France) and T. Bounahmidi (Agdal Robat, Morocco) 175–184

Erratum 185

Volume 73, No. 3

Vapor–liquid equilibria for polyatomic fluids from site–site computer simulations: pure hydrocarbons and binary mixtures containing methane
J.J. de Pablo, M. Bonnin and J.M. Prausnitz (Berkeley, CA, USA) 187–210

Perturbation theory for mixtures of polar and non-polar anisotropic molecules
T. Boublík (Prague, Czechoslovakia) 211–224

Molecular thermodynamics on the basis of an equation of state for argon. Part IV. Systems of non-linear molecules
H. Roth and K. Lucas (Duisburg, Germany) 225–241

Thermodynamic description of "constant volume" mixing processes by means of a path variable
I.M.S. Lampreia and J.C.R. Reis (Lisbon, Portugal) 243–265

Thermodynamic properties of mixing for $SnCl_4$ dissolved in supercritical CO_2: a combined experimental and molecular dynamics study
N.F. Giles, J.L. Oscarson, R.L. Rowley, W.K. Tolley and R.M. Izatt (Provo, UT, USA) 267–284

The experimental determination and modelling of VLE for binary subsystems of the quaternary system $N_2 + CH_4 + C_4H_{10} + C_{14}H_{30}$ up to 1000 bar and 440 K
V.V. de Leeuw, Th.W. de Loos, H.A. Koojiman and J. de Swaan Arons (Delft, The Netherlands) 285–321

Phase equilibria in the binary system carbon disulfide–carbon dioxide
W.E. Reiff, H.Roth and K. Lucas (Duisberg, Germany) 323–338
